NEW 7 Series
AR767

NEW 7 Series Range

BLUE CLEAN PRO
HIGH PRESSURE WASHER

DUALPOWER SYSTEM

DPS 2 DUALPOWER SYSTEM

The AR767 features an innovative DPA system that allows users to select their preferred operating mode using a convenient three-position switch: **power off**, **Position I**, and **Position II**.

Position I activates the Total Stop System (TSS), which automatically shuts off the motor when the trigger gun is released—helping reduce wear on the pump.

Switching to **Position II** engages bypass mode for continuous run and flow, ideal for demanding applications and extended cleaning sessions. *
