## ANY QUESTIONS??

### which base?

We've matched our bases to our toppings, pairing a more robust dough (romano) with strongly flavoured pizzas and a delicate, thin-stretched dough (tonda) for the lighter ones. All our pizzas are available on a GF base if desired.

### what is pissaladiere?

A staple of every bakery counter on the Italian/French border. A soft and light bread topped traditionally with slow-cooked onion, anchovy and olive. We've added a fresh tomato and oregano option. A perfect all day snack or as a bite with drinks.

### what's Italian hot chocolate?

It's thick, dark, velvety but not milky, not too sweet, perfect for dipping a pastry in.

### what is schiacciata?

A bread from Tuscany, considered in Italy the perfect sandwich bread. Similar in thickness to focaccia but lighter and softer with a crisp top.
